Entrepreneurial Learning

## Summer Camp

at St. Anthony Catholic School

St. Anthony Catholic School is honored to partner with VentureLab to provide three innovative summer camp programs designed to challenge and engage your child through hands-on learning. Each program allows students to grow in confidence through the entrepreneurial mindset, creative problem-solving, and embracing set-backs as an opportunity to learn. All camps are offered based on an 8 camper minimum.

### YOUTH STARTUP

**GRADES K - 2, 3 - 5, 6 - 8**

Youth Startup teaches kids the fun (and fundamentals!) of entrepreneurship—removing the barriers that so often keep them from using their natural talents to pursue STEM education and careers. By taking their own ideas and bringing them to life, students learn to not hold back when it comes to pursuing their dreams.

**June 12-16, 19-23, 26-30, July 10-14**

### GAMER

**GRADES K - 2, 3 - 5**

Gamer turns a student's passion for games (board, card, digital) into a hands-on opportunity for expressing their creativity and imagination through design and storytelling. In addition to learning the process of game design, students also learn by taking the entrepreneur's perspective.

**June 19-23, 26-30, July 10-14, 17-21**

### MAKER

**GRADES 6 - 8**

Maker introduces students to the Maker mentality through hands-on activities, such as “reverse engineering” or learning by taking objects apart, that inspire curiosity, creativity, and collaboration. Students experiment with technologies, including 3D printing and design, and participate in interactive, engineering-oriented activities, all while learning the entrepreneurial process and how it can bring new creations to markets.

**June 26-30, July 10-14, 17-21**
